MicroClear® MicroChill™ is a high potency, bacteria-laden, powdered formulation specifically designed for Cold Weather applications for use in degrading many types of waste. **MicroClear® MicroChill™** contains a specially isolated blend of microorganisms, micro/macronutrients, and surface tension suppressants/penetrants. **MicroClear® MicroChill™** contains a unique and **newly patented** proprietary blend of psychrophilic microorganisms that are naturally occurring bacteria with the ability to grow at 4°C, and lower. Because of the diversity of the microorganisms and enzyme systems, incorporated into this product, it is excellent for use in *Municipal and Industrial Wastewater applications*. The safe, naturally occurring bacteria are present in high numbers to handle difficult to treat wastewater problems in lower temperatures.
